Projects

Company: FIS Global Business Solutions PVT. Ltd

Duration: 06 Months

Solution: Cloud Services – Project Management Tool

Platform – Asp.net MVC

Overview:

GDO is a web-based Project management tool specially designed as a set of guiding principles and processes for managing a project. GDO has all the necessary features that you need to efficiently plan your projects running on time, manage available resources, track the problems, and keep all the stakeholders involved. This tool can juggle all those little tasks for you, leaving you and your team free to get real work done. GDO undergoes various steps to measure the health of the project, this includes basic, weekly, milestone, risk, and issue information, it also generates reports for the management to recognize what has to be done in any given project so that they can plan better to ensure timely project completion.

Features:

- Improved planning and scheduling
- Better collaboration
- Effective task delegation
- Easier integration of new members
- Effective risk mitigation
- Enhanced productivity

Responsibilities:

- Requirements gathering and analysis on project for same
- Communicate and follow up with team about specific projects and their goals
- Assist and support project team members in completing the project.
- Coordinate and schedule execution of the project.
- Prepare prototypes for architecture layers for various applications and databases.
- Develop and write high quality coding that meets customer requirements.
- Develop and implement programs, designs and codes.
- Perform unit testing and maintain software programs and applications.
- Develop MS SQL server applications like T-SQL, and stored procedures.
- Recommend strategic improvements to optimize performances.
- Follow up with the client to understand the change in requirement and deliver the same

Environment:

ASP.Net MVC, C#, Dot Net Framework 4.0, Entity Framework, HTML, Ajax, Java Script, jQuery.

Company: FIS Global Business Solutions PVT. Ltd

Duration: *14 months*

Solution: Summit

Platform – Asp.net MVC

Overview:

Summit is a new self-contained software product which is developed to overcome the problems that have occurred due to the current manual system. It provides better options for the problem of handling large scale of physical file system, for the errors occurring in calculations and all the other required tasks that has been specified by the client. The outcome of this project will increase the efficiency of almost all the tasks done at the FIS in a much convenient manner.

BI prepares almost 70 MIP's on a monthly basis for all the processes in FIS. The preparation of MIP is a lengthy task involving the HR, process managers, BI & Operations. It is prepared manually on excel by calculating the MIP's for all employees and providing it to the HR and then sending it to the finance team for further processing. Summit will save us major time by automating the MIP process hence saving us a huge amount of time with 100% accuracy.

Responsibilities:

- Requirements gathering and analysis on project for same
- Communicate and follow up with team about specific projects and their goals
- Assist and support project team members in completing the project.
- Coordinate and schedule execution of the project.
- Prepare prototypes for architecture layers for various applications and databases.
- Develop and write high quality coding that meets customer requirements.
- Develop and implement programs, designs and codes.
- Perform unit testing and maintain software programs and applications.
- Develop MS SQL server applications like T-SQL, and stored procedures.
- Recommend strategic improvements to optimize performances.
- Follow up with the client to understand the change in requirement and deliver the same

Environment:

ASP.Net MVC, C#, Dot Net Framework 4.0, Entity Framework, HTML, Ajax, Java Script, jQuery.

Company: Jay Bauer Group

Duration: 20 *months*
