Company - FIS Global Business Solutions India Pvt. Ltd.

Department: BAT BI

Duration- 9 months

Project: Summit

Platform: Asp.net MVC

Description:

Summit is a new self-contained software product which is developed to overcome the problems that have occurred due to the current manual system. It provides better options for the problem of handling large scale of physical file system, for the errors occurring in calculations and all the other required tasks that has been specified by the client. The outcome of this project will increase the efficiency of almost all the tasks done at the FIS in a much convenient manner.

BI prepares almost 70 MIP's on a monthly basis for all the processes in FIS. The preparation of MIP is a lengthy task involving the HR, process managers, BI & Operations. It is prepared manually on excel by calculating the MIP's for all employees and providing it to the HR and then sending it to the finance team for further processing. Summit will save us major time by automating the MIP process hence saving us a huge amount of time with 100% accuracy.

Responsibilities:

- o Requirements gathering and analysis on project for same
